

## SETTLEMENT PROFILE – FORMAT

As part of our current activities on data compilation and publishing for the Bureau, I was assigned by Mr Saho to create what might be referred to as “settlement profile” for the 2003 population and housing census. This shall feature all the settlements in The Gambia at LGA and District level with their total population by a certain age cohort, and probably with number of households.

The format of this document will be characterized by tables, maps and charts with write up analyzing the tables and charts at each level – country, lga and district. The main contents of the document will be covered in eight chapters: chapter one will be introduction; with rest of the chapters each exclusively discussing one LGA and its districts, except for Banjul and Kanifing LGAs which will make up one chapter. Below is the proposed design of the document by content.

- Preface and acknowledgements
- Chapter one: introduction
- Chapter two: settlements in Banjul and Kanifing LGAs
- Chapter three: settlements in Brikama LGA
- Chapter four: settlements in Kerewan LGA
- Chapter five: settlements in Mansakonko LGA
- Chapter six: settlements in Kuntaur LGA
- Chapter seven: settlements in Janjanbureh LGA
- Chapter eight: settlements in Basse LGA
- Back page: references

The contributors to the preparation of this settlement profile will be the following people:

- SG or DSG: Preface and acknowledgements
- Mr Baboucarr Daffeh : Map production
- Alagie Fanneh and Ebrima Manneh: Data collection, compilation, presentation and analysis
